

THE UNIVERSITY *of* EDINBURGH

Edinburgh Award (School of Geosciences: Community Building)

This award is given to students in the School of Geosciences whom the University has recognised for actively working to maximise their impact and excel in their community building role. These students have taken responsibility for designing and running events with the aim of increasing the sense of community with the School of Geosciences.

In successfully completing the Edinburgh Award, these students will have been helped to:

- increase their self-awareness;
- make the most of their existing strengths and build new skills/abilities against clear development goals;
- understand the processes involved in having a planned positive impact and strategically working to excel, enabling them to have impact and make a difference whatever situation they are in; and
- look not only at their community-building role, but also to capitalise on their experiences elsewhere to inform and enhance their community-building role, and vice versa.
